

N110F

Clamp mount for KUM8 and KUM9

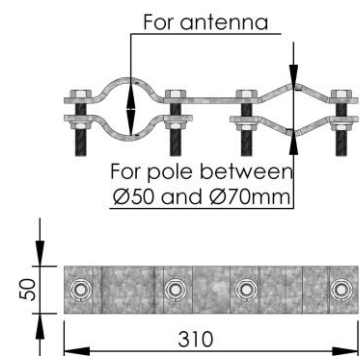

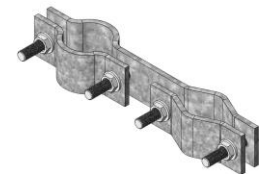

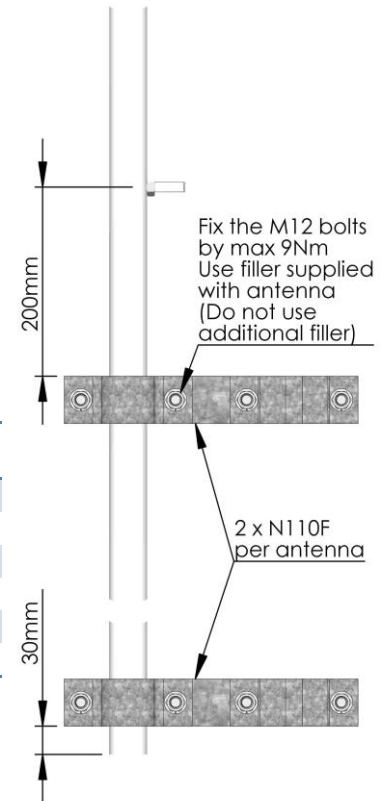

This mount is made for side mast or vertical rail mounting of the KUM8 and KUM9 antenna families.

N110F is a heavy duty steel mount with galvanized surface thus withstanding long term rough weather conditions at sea.

Each antenna needs two N110F kits for secure installation. The mounting is quick and simple by means of the brackets and bolt sets.

Mechanical Specification:

Material	Galvanized steel
Finish	Bright grey, galvanized
Weight	0.14kg (0.30 lbs)
Mounting method	Clamp mount
Antenna requirement	Ø40 radomes with sleeve
Pole size	50 to 70mm (2 to 2.8 in)

This part fits with:

This product is specifically designed for mounting of the following HF/SSB antenna families: KUM8 and KUM9.

Two N110F kits are needed per antenna.
